5th Annual INDOOR ENVIRONMENT'97

SETTING THE STANDARD FOR HEALTHY BUILDING MANAGEMENT

April 7-9, 1997
Hyatt Regency Hotel on the Inner Harbor
Baltimore, Maryland

Sponsored By:

- Indoor Environment Review / IAQ Publications, Inc.
- National Institute of Building Sciences
- U.S. Green Building Council
- EIA Environmental Information Association
- bcia Business Council on Indoor Air
- TIEQ Total Indoor Environmental Quality Coalition
- AIHA American Industrial Hygiene Association
- The Association of Higher Education Facilities Officers
- AARST American Association of Radon Scientists and Technologists
- Envirosense Consortium
- Clean Air Device Manufacturers Association
- NADCA National Air Duct Cleaners Association
- National Safety Council

Speaker Biographies

Allen Abend
Chief, School Facilities Office
Maryland Department of Education
School Facilities Branch
Baltimore, MD

Allen Abend directs the indoor air quality program in Maryland's public schools. He is a licensed architect and has a master's degree in educational administration from Columbia University and a bachelor's degree in architecture from Rensselaer Polytechnic Institute.

Dick Allegrati
Clean Air Device Manufacturers Association
Fairfax, VA

Stephen Ashkin
Vice President, Institutional Division
Rochester Midland Corp.
Rochester, NY

Stephen Ashkin has more than 15 years of industry experience. He is considered a leading national authority on the use of renewable resources and pollution prevention strategies based on "green" technologies. Ashkin's work includes involvement with the EPA's efforts to develop definitions for "environmentally preferable" products and he currently serves as Task Group Chairman for EPA's Green Chemistry Challenge. He is an active member of the joint task force group on the U.S. Chemical Industry —VISION 2020— sponsored by the Department of Energy, American Chemical Society and the Chemical Manufacturers Association.

Bob Baker
President
BBJ Chemical
Tampa, FL

Before establishing his Tampa-based company, Bob Baker served as vice president of operations of a manufacturer of hospital disinfectant and sterilization compounds in St. Petersburg, where he was responsible for research and development and regulatory affairs. The company worked in the area of infection control and antimicrobial products.

David Bearg
President
Life Energy Associates
Concord, MA

David Bearg has provided indoor air quality diagnostic and mitigation services, and computer modeling services for more than 13 years. He has also performed measurements of specific indoor air contaminants including respirable particulate matter, volatile organic compounds, radon, and bacteria.

PM3006517245

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

GEORGE BENDA
CHAIRMAN AND CEO
CHELSEA GROUP, LTD.
ITASCA, IL

George Benda is a nationally recognized authority on managing the indoor environment, providing technical consulting and support to the HVAC industry, as well as building owners and managers. He is the chairman and CEO of Chelsea Group, Ltd., an environmental consulting, information services and technology development firm specializing in indoor air quality. He is also an active member of ASHRAE. Benda was named the Environmental Educator of the Year for 1996 by the Association of Energy Engineers.

TOBIE BERNSTEIN
ATTORNEY
ENVIRONMENTAL LAW INSTITUTE
WASHINGTON, DC

Tobie Bernstein, who has been with the Environmental Law Institute (ELI) since 1992, has worked extensively on public health issues, including indoor air pollutants, radon, and lead-based paint. From 1986-1991, she represented indigent clients in state and federal courts and before state and federal administrative agencies. Prior to joining ELI, Ms. Bernstein was an attorney with the Legal Aid Bureau Inc. of Southern Maryland, where she practiced in the areas of housing, family, disability and child welfare law.

MARILYN BLACK
CHAIRMAN AND CHIEF SCIENTIST
AIR QUALITY SCIENCE, INC.
ATLANTA, GA

Marilyn Black is chairman and chief scientist at Air Quality Science, Inc. an Atlanta firm specializing in indoor air quality including environmental chamber evaluations of indoor products and activities, lab analysis for TVOC, VOCs, formaldehyde, fungi and bacteria, as well as investigations of buildings for sick building syndrome. Black is an expert in characterizing indoor air pollutants and their sources. She holds a Ph.D. in chemistry from the Georgia Institute of Technology and has published more than 100 papers on environmental chemistry and indoor air quality.

GREG BOOTHE
INDUSTRIAL/ENVIRONMENTAL HYGIENE MANAGER
GOBBELL HAYS PARTNERS, INC.
NASHVILLE, TN

Greg Boothe is an industrial and environmental hygiene manager for Gobbell Hays Partners, and has more than 12 years of industrial hygiene and safety experience in academic, industrial, research, office, residential, and government facilities. He also established and directs Gobbell Hays Partners' asbestos laboratory.

LAUREEN BURTON
CONSUMER PRODUCT SAFETY COMMISSION
BETHESDA, MD

TOM CAPES
MARKET DEVELOPMENT MANAGER
AAF INTERNATIONAL
LOUISVILLE, KY

Tom Capes is the market development manager of the Air Filtration Products division of AAF International, focusing on markets where air filtration products are essential elements in the improvement of indoor air quality. These markets include healthcare, commercial building, education and hospitality.

PM3006517246

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

Paul Cammer
President
Business Council on Indoor Air
Fairfax, VA

Paul Cammer formed his own consulting firm specializing in scientific and regulatory strategies for industry in 1986. From this organization, the BCIA was born in 1988. He has also worked for the Synthetic Organic Chemical Manufacturers Association and in EPA's Office of Pesticides and Toxic Substances. Cammer has an undergraduate degree in entomology and a master's degree and Ph.D. in biochemical pharmacology.

Willard Christoffer
Director, Industrial Hygiene Services
Carnow, Connibear, & Associates, Ltd.
Chicago, IL

Willard Christoffer has spent the past 12 years implementing programs to bring firms into compliance with acceptable practice in the area of regulations and policies. He is currently responsible for program development, project coordination and management, and technical oversight of field operations. Before joining CCA in 1989, Christoffer was director of industrial hygiene at Analytical Laboratory for Environmental Excellence in Illinois.

Charles Cochrane
President
Cochrane Ventilation Inc.
Wilmington, MA

Charles Cochrane has been in the ventilation cleaning industry for 16 years and is president of Cochrane Ventilation, a commercial ventilation cleaning and indoor air quality firm founded in 1950. He has worked with numerous federal agencies reviewing and evaluating methods of air duct cleaning. He is also president of the National Air Duct Cleaners Association, and a member of ASHRAE and the American Industrial Hygiene Association.

Al Colon
Halliwell Engineering Associates
San Francisco, CA

Jeffery De Chacon
President
Pyramid Environmental Systems, Inc.
Sparta, NJ

Jeffrey De Chacon is well known in the U.S. and abroad for his work in the removal of hazardous substances from HVAC systems and affiliated equipment. He has extensive practical knowledge of all methods of testing for airborne contamination and pollutants inlcudes testing and mitigations services for organic vapor analysis, asbestos, fiberglass, CC/MS, radon gas, and testing for radiation from CRT screens.

Mark Diamond
Attorney-At-Law
The Law Firm Of Mark Diamond
Stamford, CT

Mark Diamond is an attorney-at-law in Stamford, Conn., and New York City. He represents contractors, building owners and managers, architects, engineers and plaintiffs in indoor environmental law. He is chairman of the American Association of Trail Lawyers' Indoor Environmental litigation section and is the author of The New York Environmental Law Series, "Indoor Air Pollution" published by Lawyers Cooperative Publishing.

PM3006517247

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

Elissa Feldman
Associate Director
Indoor Environments Division
Environmental Protection Agency
Washington, D.C.

From 1989 until her recent assumption of deputy responsibilities, Elissa Feldman served as chief of the Implementation Branch, where she managed the development and dissemination of the program's guidance and outreach material, training programs and regional relations. She was also instrumental in instituting EPA's very successful indoor air quality information clearinghouse, IAQ INFO.

Mary Ellen Fise
General Counsel
Consumer Federation of America
Washington, DC

Mary Ellen Fise is responsible for representing consumers on a variety of issues before Congress and the regulatory agencies. She has also served as CFA's Product Safety Director. In addition to helping coordinate consumer policy development, she is primarily responsible for CFA's product safety and indoor air quality programs. She serves as co-chair of the Home & Product Safety and Indoor Air Quality Committees for the Coalition for Consumer Health & Safety.

Peter Granholm
Apex Environmental
Rockville, MD

Peter Granholm is responsible for the conduct and management of comprehensive industrial hygiene related projects , health and safety assessments, and environmental due diligence/compliance investigations. He has performed numerous indoor air quality investigations of private, commercial and government facilities. During these investigations he has identified sources of poor indoor air and occupant complaints through both the analysis for specific airborne contaminants, and by reviewing and observing building operations, maintenance and management practices.

Marc Gaffrey
Partner
Hoagland, Longo, Moran, Dunst & Doukas
New Brunswick, NJ

Marc Gaffrey is the supervising partner of the Toxic Tort and Environment Litigation Department. He has extensive experience in the litigation of toxic and environmental coverage disputes, as well as the defense of environmental cleanup and toxic tort claims, including, but not limited to asbestos, lead paint, sick building syndrome and various pesticides. He also has authored numerous articles and lectured on numerous topics in the toxic tort field.

Frank Gallo
Vice President
LZA Technology
Trumbull, CT

Frank Gallo has 21 years of engineering and facilities management experience. He is currently responsible for the indoor air quality department of LZA Technology, a firm providing complete building investigation and design services. He is also on AIHA's IEQ Committee, ASHRAE's operations and maintenance management committee, and is an instructor at Drexel University and the Mid-Atlantic Environmental Hygiene Resource Center.

PM3006517248

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

David Governo
Attorney
Governo and Kavanagh
Boston, MA

David Governo concentrates on toxic tort, product liability, environmental and insurance coverage. He represents defendants as national counsel, regional counsel, and trial counsel in asbestos, lead, chemical, indoor air pollution, and other toxic tort and environmental cases. Governo has defended manufacturers, contractors and owners in indoor pollution cases and has lectured frequently on toxic torts.

Jack Halliwell
President
Halliwell Engineering Associates, Inc.
East Providence, RI

Jack Halliwell develops and implements corporate indoor air quality programs, policies and procedures. He testified in the hearings on the proposed OSHA IAQ Rule and worked with EPA on the development and implementation of the Building Air Quality Alliance Program. He is a registered professional engineer in 13 states and is active in a number of professional societies including ASHRAE, National Institute of Building Sciences, and Association of Energy Engineers.

Steve Hays
Chairman
Gobbell Hays Partners, Inc.
Nashville, TN

Steve Hays is on the board of directors of the National Institute of Building Science (NIBS). He has served on NIBS committees on lead-based paint and radon. Hays was also on the EPA committee which established regulations for the Asbestos Hazard Emergency Response Act (AHERA). He is a member of the seminar faculty at the University of California at Berkeley and Georgia Tech Research Institute and conducts dozens of lectures each year on a wide range of environmental topics.

Tim Hebert
President
Air Purification Specialists
Pavo, Ga.

Tim Hebert currently serves on the board of directors of the National Air Duct Cleaners Association (NADCA). While his experience ranges from residential to high-rise facilities, the focus of his research has been aimed at the reduction/elimination of microbial amplification sites within HVAC systems serving medical facilities.

Ephraim Heller
President
LightStream Photocatalytic
Alameda, CA

Ephraim Heller founded LightStream's parent company, EHC, in 1991, and opened the development lab in January 1993. He has managed the company's commercialization effort for both its medical sensor and photocatalytic technologies product lines. The first medical sensor products developed by EHC were introduced on the market in April 1995. Heller has raised more than $3 million in private investment capital and R&D awards to develop LightStream's photocatalytic technologies.

PM3006517249

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

ELIOTT HORNER
MICROBIOLOGY LABORATORY DIRECTOR
AIR QUALITY SCIENCE, INC.
ATLANTA, GA

Eliott Horner holds a Ph.D. in Forest Pathology from Virginia Polytechnic Institute and State University. He has previously lectured for the American Society for Microbiology on "The Health Effects of Fungi" and the American Academy of Allergy, Asthma and Immunology on "The Nature of Outdoor Fungus."

TIM HARDIN
IAQ PROGRAM COORDINATOR
WASHINGTON STATE DEPARTMENT OF HEALTH
OLYMPIA, WA

Tim Hardin holds a bachelor's degree in environmental chemistry from the University of Washington. He has assisted in the development of and made numerous presentations at indoor air quality training courses for local health departments, local and state agencies, school personnel, facility managers, and private consultants. Prior to assuming his present assignment, Hardin worked fro the Seattle-King County Department of Public health as an environmental health specialist in their health/safety and chemical/physical hazards programs.

ROBERT INFELISE
PARTNER
COX, CASTLE & NICHOLSON
LOS ANGELES, CA

Robert Infelise chairs the environmental litigation group within Cox, Castle & Nicholson, which specializes in real estate-related matters. He also teaches courses on environmental law and cost recovery litigation at Boalt Hall School of Law. Infelise received his undergraduate and law degrees at the University of California at Berkeley.

CRAIG JOBBER
CEO
NATIONAL AIR TECHNOLOGIES, LTD.
VANCOVER, BC

The firm, along with it's Toronto-based counter part —Ontario Duct Cleaning, Ltd, has offered professional and effective services to the indoor air quality and duct cleaning industries for 17 years.

MICHAEL JAWER
ASSISTANT VICE PRESIDENT
GOVERNMENT AND INDUSTRY AFFAIRS
BUILDING OWNERS & MANAGERS ASSOCIATION
WASHINGTON, DC

Michael Jawer has been involved in association government affairs for nine years and is a graduate of the George Washington University. BOMA has sponsored more than 55 indoor air quality management seminars in conjunction with the EPA and recently supported a federal ban on smoking in the workplace.

PM3006517250

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

Russell Kulp
Research Engineer
Environmental Protection Agency
Research Triangle Park, NC

Russell Kulp is responsible for an indoor air quality research program related to HVAC systems for the Environmental Protection Agency.

Bob Krell
President
IAQ Technologies
Syracuse, NY

Bob Krell specializes in air handling system cleaning and indoor air quality consulting. His work includes the design and development of high-tech cleaning and inspection devices, and advanced procedures for commercial air duct cleaning with an emphasis on health care facilities. Krell is also first vice president of the National Air Duct Cleaners Association.

James Krueger
Marketing Manager
AEGIS Environmental
Midland, MI

James Krueger has been involved in the indoor environment industry since 1986 and has practical experience using a wide variety of testing equipment, he has performed environmental testing and mitigation in residential, commercial and industrial structures. He has represented industry on several EPA protocol review panels and in testimony before subcommittees of the U.S. House and Senate. He is also an active member of the American Association of Radon Scientists and Technologists (AARST).

Mary Lamielle
Director
National Center for Environmental Health Strategies
Voorhees, NJ

The National Center for Environmental Health Strategies is a nonprofit organization which develops creative solutions to environmental health problems. In addition to her work with NCEHS, Mary Lamielle has participated in a number of federal and state review panels and has been involved in public education projects on indoor pollution, pesticides, workplace and housing accommodations, and disability rights.

Frank Lewis
President
The EnviroCenter
Marlton, NJ

Through Acumen Technologies, Lewis operates the EnviroCenter, an on-line global indoor air quality marketing and information resource for indoor environmental companies, indoor air quality professionals, end-user customers, students and the global marketplace. Lewis was previously director of the U.S. Public Health Service's Office of Environmental Hygiene. He is also one of the founders of the MidAtlantic Environmental Hygiene Resource Center in Philadelphia.

Ed Light
Pathway Diagnostics
Reston, VA

Ed Light is a certified industrial hygienist specializing in indoor air quality for more than ten years. Prior to becoming a consultant, Ed directed one of the first state-wide indoor air quality technical assistance programs in the country while with the West Virginia Department of Health. He currently serves as immediate past chair of the American Industrial Hygiene Association's

PM3006517251

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

IEQ Committee and is co-chair of the International Society on Indoor Air Quality Task Force on Investigation Methods. He also co-authored the widely distributed EPA manual Building Air Quality and has conducted more than 500 indoor air quality investigations.

JOSEPH MANKO
SENIOR PARTNER
MANKO, GOLD & KATCHER
BALA CYNWYD, PA

In addition to his duties as a founding partner of Manko, Gold & Katcher, Joseph Manko teaches at the University of Pennsylvania Law School and Vermont Law School. He has also lectured on indoor air liability at the MidAtlantic Environmental Hygiene Resource Center since 1992. He graduated from Harvard University Law School in 1964.

MIKE MCGUINNESS
PRINCIPAL
RK OCCUPATIONAL & ENVIRONMENTAL ANALYSIS, INC.
PHILIPSBURG, NJ

EDWARD MONTZ
PRESIDENT
INDOOR AIR SOLUTIONS, INC.
POTTSTOWN, PA

Edward Montz has been involved in more than 700 indoor air quality projects including the consultation and diagnosis of indoor air quality issues for commercial office buildings, schools, hotels, health care facilities, industrial facilities and government buildings. Before forming Indoor Air Solutions, he was vice president of the indoor air quality division of a national environmental company. Montz also headed the state of Delaware's indoor air quality program for four years.

DAVID ODOM
VICE PRESIDENT, IAQ SERVICES
CH2M HILL
ORLANDO, FL

David Odom has more than 10 years of experience solving indoor air quality and moisture, mildew and corrosion problems. He has provided indoor air quality services related to building design, construction, remediation, and operation to a wide variety of buildings including hospitals, schools, courthouses, hotels, dormitories and commercial facilities.

TED PASSON
PURE EARTH ENVIRONMENTAL LABORATORY
PENNSAUKEN, NJ

Ted Passon has more than 28 years of clinical pathology experience, and is a board certified in Laboratory Bioanalysis by the Medical Boards of New Jersey, Pennsylvania, Delaware, and New York state. Presently, he serves on the American Board of Bioanalysts, for certification in microbiology and immunology, New Jersey Medical Board of Laboratory Directors and was elected by the New Jersey Health Department to serve as advisor for the Clinical Laboratory Advisory Committee.

JAMES PAGLIARO
PARTNER
MORGAN, LEWIS & BOCKIUS
PHILADELPHIA, PA

Since 1985, James Pagliaro has practiced almost exclusively in the field of toxic tort litigation. He has extensive experience in the scientific and medical aspects of tort litigation and speaks regularly on litigation and trial

PM3006517252

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

practice issues as a faculty member of the Pennsylvania Bar Institute. Before joining the firm, Pagliaro was an attorney with the Department of Labor in Philadelphia where he handled OSHA prosecutions.

Michael Price
President
MAP Environmental Services
Sterling, VA

Michael Price's experience covers indoor air quality engineering, building industrial hygiene assessments and indoor air quality mitigation. In addition to his consulting work, Price conducts the IAQ Management Workshop, a program designed to educate building owners, managers and facility personnel on the importance of indoor air quality management. He has authored more than 500 indoor air quality inspection reports, articles, training manuals and other technical reports.

Doris Rapp
Environmental Allergy Center
Buffalo, NY

James Reese
York International
Overland Park, KS

Mark Rigler
Materials Analytical Services
Norcross, GA

Larry Robertson
President
Mycotech Biological, Inc.
Jewett, TX

Mycotech Biological Inc. is an indoor air quality laboratory offering analytical services and research to the indoor air quality industry. Several of Larry Robertson's research projects on bioaeosols have been published in journals, such as the Annals of Allergy, ASHRAE, and the American Industrial Hygiene Association and National Air Duct Cleaners Association.

Harris Rothenberg
President
Airways Systems
Skokie, IL

Harris Rothenberg has been in the air duct cleaning industry for 23 years, and is a past president of the National Air Duct Cleaners Association.

PM3006517253

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

Rick Stonier
Solomat-Neotronics
Norwalk, CT

Rick Stonier has been employed in a sales management capacity for Solomat, a manufacturer of sensors and monitors for measuring and datalogging environmental parameters, for more than ten years. He is a member of the Instrumentation Society of America, the Environmental Engineers & Managers Institute of Association of Energy Engineers and of ASHRAE, where he is on technical committee 1.2 (instruments and measurements).

Mike Schell
Vice President, Marketing & Sales
Engelhard Sensors
Goleta, CA

Mike Schell has developed and delivered numerous training programs in air quality and building technology for Canada's R200 Energy Efficient Housing Program. He has been a trainer for EPA's programs for Radon Mitigation and Indoor Air Quality Training for State Officials. Schell was formerly vice president of sales and marketing for Telaire, director of marketing for SEMCO, and a market manager of Air Quality Products for Honeywell Inc.

Larry Schoen
Principal
Schoen Engineering
Columbia, MD

Schoen Engineering is engaged in a broad range of technical support for real property and asset managers. The firm specializes in client-centered economical solutions to problems which have engineering or environmental content. This includes analysis of property condition and operations, design and financial aspects of capital improvements to building systems, regulatory compliance, cost containment, and risk reduction. Larry Schoen was most recently with The Rouse Co.

Richard Shaughnessy
Program Manager
Indoor Air Pollution Research Center
Environmental Research & Technology
University of Tulsa
Chemical Engineering Department
Tulsa, OK

Richard Shaughnessy has more than nine years experience as a chemical engineer specializing in indoor air quality research and educational outreach. His research efforts have focused on chamber experiments on filtration aspects of varying types of air cleaners in the removal of a broad spectrum of indoor air quality contaminants. As the primary contact for the Southern Training Center, Shaughnessy oversees indoor air quality and radon education efforts throughout the southern and southwest U.S. for EPA.

James Tshudy
Principal
Environmental Life Cycle Assessment
Ephrata, PA

James Tshudy currently owns a environmental consulting firm specializing in environmental life cycle assessment, corporate environmental management systems, and indoor air quality. Previously with Armstrong World Industries, where he spent seven years as a manager of

PM3006517254

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

product environmental performance and managed research and development for 17 years. He is also a member of ASHRAE SSPC 62R and is active in ASTM D22.05 on indoor air quality.

Steven Taylor
Principal
Taylor Engineering
Oakland, CA

For nearly five years, Steve Taylor has been a member of the committee revising the ASHRAE Standard 62, "Ventilation for Acceptable Indoor Air Quality." He became the chair of that committee last year. He is also the primary author of the HVAC sections of ASHRAE Standard 90.1, "Energy Conservation in New Non-residential Buildings" and California's Title 24 Energy Standards.

Wayne Thomann
Director
Occupational and Environmental Safety
Duke University Medical Center
Durham, NC

Wayne Thomann has more than 12 years experience in indoor air quality and bioaresol research, teaching and consulting. He is co-director of the NIOSH Educational Resource Center which offers three courses at Duke University, "Concepts of Biohazard Science," Managing Hazardous Chemicals," and "Managing Chemical and Biological Hazards." He is also a member of master's and doctoral degree boards at University of North Carolina and Duke.

Bob Thompson
IAQ In Schools Project Manager
Indoor Environments Division
Environmental Protection Agency
Washington, DC

Bob Thompson's responsibilities as an environmental engineer include managing indoor air issues as they related to schools, building architecture and ventilation systems. The guidance document entitled "Indoor Air Quality Tools for Schools" was released early in 1996.

John Tiffany
Technical Director
MidAtlantic Environmental Hygiene Resource Center
Bedminster, NJ

John Tiffany has worked extensively in both the public and private sectors on indoor air quality investigations. As a consultant to the U.S. Public Health Service, he directs studies of federal buildings with indoor air quality complaints. Tiffany is also technical director for 15 courses at the MidAtlantic Environmental Hygiene Resource Center. He was chair of AIHA's IEQ committee and is a member of ASHRAE.

Aaron Trippler
Director, Government Affairs
American Industrial Hygiene Association
Fairfax, VA

Aaron Trippler oversees more than 70 local sections of AIHA and is chief liaison with Congress and federal agencies. Before joining AIHA, he served as executive director of Health Care Solutions for America and as vice president for Communicating for Agriculture, both of which are national nonprofit organizations.

PM3006517255

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001

Al Veeck
Vice President Of Sales
Tidewater Air Filter Fabrication Co. Inc.
Virginia Beach, VA

Al Veeck is a certified air filter specialist, has been involved in indoor air quality investigations since 1985. In addition to his duties at TAFFCO, he is director of BIO-TEC Inc., which deals exclusively with biohazards and indoor air quality. Veeck is a member of ASHRAE's committee on Particulate Air Contaminants and is on the National Air Filtration Association Board of Directors.

Art Wheeler
President
Wheeler Engineering Co.
Towson, MD

Art Wheeler is a registered professional engineer with more than 40 years experience in the design of building refrigerating and air conditioning systems. His is an ASHRAE Fellow, recipient of the Society's Distinguished Service Award and has served on numerous standing, technical and standards committees, and as a voting member of the Project Committees for Standard 62-1989 and 62R.

Anthony Worthan
Manager, Indoor Air Services
Air Quality Sciences, Inc.
Atlanta, GA

Anthony Worthan designs test protocols for indoor air quality investigations and creates specifications for the indoor air quality services offered by AQS. He served as task leader for studies of air quality in public schools in Florida and Washington and for the state of Washington Indoor Air Quality Pilot Study conducted in conjunction with EPA. Worthan holds a master's degree in public health from Emory University.

Chin Yang
P & K Microbiology Services, Inc.
Cherry Hill, NJ

He has more than 15 years of experience working with allergists, industrial hygienists, and health professionals on microbiology related problems in office buildings and in industrial settings, and on Legionella investigation.

PM3006517256

Source: https://www.industrydocuments.ucsf.edu/docs/krgj0001
